

Municipality OF Digby

Integrated Community Sustainability Plan (ICSP)

The Municipality of Digby is developing an Integrated Community Sustainability Plan (ICSP). This plan is an important document that will provide direction on how our community can achieve its desired future while maintaining a balance between its environmental, social, cultural and economic qualities. One of the first steps in developing an ICSP is creating a long term vision for the community, based on input from you—the citizens of the Municipality of Digby.

You're Invited. We need your help to develop a long term vision for the Municipality of Digby. To that end, a series of Community Visioning Sessions will be taking place at various locations in June. On behalf of Warden Jim Thurber, you're invited to attend one of these sessions. Each session will have the same format; we want to hear about what you like most about our community, what you would like to change and what your hopes and dreams are for its future. Please feel free to attend whichever session is most convenient.

Please **RSVP** by **FRIDAY, JUNE 12th** by emailing DigbyICSP@hotmail.com or by contacting Scott McMillan of Dillon Consulting at (902) 450-4000.

We look forward to seeing you at one of these sessions during the week of June 15th.
